Interior Design Services

Center of Expertise

The Kansas City District has combined with Omaha District to create the Northwest Division Center of Expertise for Interior Design and Space Planning. On behalf of the HQUSACE proponent, the center monitors technological and industry developments, assists in the development of interior design guidance, and supports the PROSPECT Interior Design course. The primary customer-reimbursable service is providing professional services to USACE districts and other Federal agencies for design and technical consultation as it relates to the field of interior design.

Available Services

- Preparation and review of comprehensive interior designs (CID), which includes building related and furnishings related interior design.

Included are:

Detailed CADD Drawings of Interior
Architectural Features, Casework, Building Finishes, and
Signage

Furnishings Packages to include Coded Furniture
Placement Plans, Cost and Procurement Data

Color, Sample & Material Boards
